

## JLab First Semester Report

**Student: Chana XXXX**

Chana is a second grade student who was recommended to the Jlab because she was struggling in her script Hebrew letter formation. She tended to write in Hebrew block and it was difficult for her to form the letters in the Script form. She couldn't recognize a few letters of the alphabet and this deficiency was holding her back from being able to participate in her grade level appropriate activities and tasks.

During her sessions in Jlab, we focused heavily on writing script letters, and at this time she can form every letter in the Hebrew alphabet properly! We are still working on some writing styles as she forms her letters bottom to top when the correct form is top to bottom, (aside from a few exceptions). Continued practice in this area is crucial for her to keep growing in this skill area. She can recognize all the letters sounds, yet still is confused with letters that sound the same, as in Kuf and Kaf, Tes and Taf, Veis and Vav, Shin and Sin. She is getting better at these and will be able to catch up to her grade level if she continues to practice the reading and writing skills we worked on at home.

She does get excited and distracted easily, it may be beneficial to schedule an evaluation for her.
