

כל ישראל יש להם חלק לעולם הבא

Imagine getting into a car, and travelling to a place you're not familiar with. What tool would you use to help you? _____

Of course! The first thing you'll want to set up is your navigation tool - your GPS or Smartphone - and plug in your destination. Imagine if we could plug in as our destination: **"עולם הבא"!**

What do you think the landmarks for getting there would be?

All along our route, we have opportunities... **choices to make** - do we turn this way or that?
We make mistakes! What happens when we make a wrong turn?
Some types of GPS say, "**Recalculating...**".
Our route changes, yet our destination remains the same.

Questions for Reflection:

1. List 3 choices that will show that you're on the right path:

2. Come up with 2 choices that you made that might veer you off the path...

3. Using your answers from #2, how can you recalculate?

**B'ezrat Hashem, we'll each hear the ultimate message,
"You have reached your destination!"**
