

# עברית בעברית

## בכיתה שלנו מדברים רק בעברית

תשע"ז  
2016-17

*In our class this year you will feel confident about your ability to communicate in everyday situations. You will be able to describe people and provide personal information about yourself and others, family, home and daily activities. You will express your thoughts and feelings about our holidays and traditions, bible studies and Israel.*

In the end of the year you will be able to.....

### Speak

*You will be able to speak, using longer sentences, sometimes even connecting them with words like "and, but, or". You will not always know every word, but you will be able to "talk around it" so that you are understood.*

### Listen

*You will be able to generally follow what is being said in Hebrew for a longer period of time, and you will notice when the speaker uses the past or future tense.*

### Read

*You will be able to read simple passages with complete understanding, and you will be able to understand the general idea of more complex texts.*

### Write

*You will be able to create dialogues and essays, and express your opinion in the past, present, and future tenses.*
