

Dear Mrs. Peters,

I really enjoyed Book Day so much! One thing I learned about is that Israel gives technology to Africa. During that program we got to pick up the ~~to~~ gallons of water and that was really fun. I also learned that Africa was really dry. It was really creative that William took things from his junk yard to build a wind mill.

One of the things that I enjoyed playing was mancala it was really interesting how to play. I also enjoyed the African dance because the kalimba was really interesting for me. I really thank you for this amazing Book Day

Sincerely,
Rose
