

Here is my Drasha class

# The Question

How Did Adam's coat fit esav?

# Potential Answering points

- It shrunk. It was a special coat so it seems natural.
- It was cut down to size by the royal fitters of Nimrod.
- They cut the coat up for material and used that as the new coat.

# The Answer

They cut the coat up for material and used that as the new coat.

# Why

In another much later pasuk it says “And he (Yaakov) made for him (Yosef) a woolen tunic.” and in gemara it says that this was made from Adam’s coat, and not he “recycled”. Meaning it could not be just cut or sewn because you could not later make a tunic, same with shrinking.

# Lesson for us

Even though something is old (from Adam) and does not have a good track record (being used to kill animals for sport) It can be made into something beautiful (like a tunic for your favorite son).
