Date:

Tikkun Olam Service-Learning PLANNER

Driving Question: How can we make a positive difference in our community's use of energy?

What energy-related problem does your team see in the DJDS community?	
How might you solve it? What is your plan?	
What work will you produce?	
Who might you work with in the community?	
Who will be helped by your work?	
Which of our middot does your project connect with, and how?	
What information might you collect along the way?	
How will you measure your success?	

You will be creating an anchor chart for a gallery walk to explain your proposal and persuade your classmates to choose it. When you have completed your planner, on the back of this paper sketch out how you will share your idea with the fifth grade community.
